PROFESSIONAL SUMMARY

Technical Lead and Full Stack Engineer with 8 years of experience building reliable production systems and leading engineering teams. Experienced in hands on development, system design, project delivery, DevOps, and developer mentoring. Delivered systems supporting 700+ daily transactions, improved production reliability, automated engineering workflows, and helped developers grow into independent project owners. Strong focus on scalable architecture, engineering excellence, and building teams that can deliver sustainably.

EMPLOYMENT HISTORY

Sept 2025 — Present	Technical Team Lead, ST Advisory	Kuala Lumpur
	- Led technical direction and end-to-end delivery across 13 projects, achieving 100% on-time delivery across completed projects. - Translated business requirements into Technical Analysis, ERDs, architecture designs, implementation strategies, and technical proposals. - Managed task breakdown, estimation, workload balancing, timeline monitoring, and delivery risk across multiple concurrent projects. - Mentored 5 developers across 3 countries, helping them grow toward independent project ownership and technical decision-making. - Standardized SOLID architecture, CI/CD, Docker, documentation, AI assisted development, and production monitoring across the engineering team.	
Aug 2024 — Oct 2025	Ruby on Rails Developer, Virtual Spirit	Kuala Selangor
	- Rebuilt the Event Management module in 2 months, delivering ticketing, attendance tracking, and notifications used by 4 organizations. - Built and maintained a SaaS job monitoring platform used by 2 client companies, supporting job tracking and staff assignments. - Delivered 2 production platforms simultaneously, handling backend, frontend, testing, and deployment end-to-end. - Maintained under-5-minute response time to issues and feature requests, ensuring fast and reliable delivery.	
Apr 2019 — Aug 2024	Full Stack Team Lead, Alodokter	Jakarta
	- Integrated pharmacy vendor and courier systems into Alodokter's e-pharmacy platform, enabling sub-30-minute medication delivery and supporting 700+ orders per day across multiple cities. - Improved checkout reliability by identifying and resolving performance bottlenecks and critical bugs, reducing order failures by 90% and significantly improving transaction success rates. - Authored comprehensive technical documentation, onboarding guides, and system references, reducing new engineer onboarding time by 25% and lowering recurring support tickets by 60%. - Delivered 60+ production releases over 5 years in collaboration with Product, Business, and Operations teams, ensuring reliable deployment of features supporting 700+ daily pharmacy transactions.	

EDUCATION

Aug 2013 — Aug 2014	Diploma in Information Systems, Institut Teknologi Sepuluh Nopember	Surabaya
---------------------	---	----------

CORE SKILLS

- Backend:** Ruby on Rails, Laravel, Adonis.js
- Frontend:** Hotwire (Turbo + Stimulus), React, Bootstrap
- Database:** PostgreSQL, MongoDB, Elasticsearch, Redis
- DevOps:** Docker, Nginx, GitHub Actions, GCP, Linux, CI/CD, SSL/TLS
- Tools:** GitHub Co-Pilot, GitHub, Notion, Portainer, RuboCop, Brakeman
